

NEMATOLOGY SEMINAR, SPRING QUARTER, 2004 (NEM 290-CRN 72523)*

115 Wellman Hall, Mondays, 4:10 to 5 PM

Instructor/Organizer: Harry K. Kaya

Date	Speaker	Title
April 5	Ed Caswell-Chen Nematology University of California, Davis	<i>Caenorhabditis elegans</i> Ecology: Lifespan, Reproduction and Plasticity.
April 12	Ed Platzer Department of Nematology University of California, Riverside Riverside	Tails from the WWW: Biogeography of Mermithid Nematodes.
April 19	Surindar Paracer Department of Biology Worcester State College Worcester, Massachusetts	Symbiosis: Some Common Molecular Themes and New Lessons.
April 26	Michael McKenry Department of Nematology University of California, Riverside Parlier, California	Replanting Walnut Orchards without Methyl Bromide: Comparison of a Dozen Tools.
May 6* *	R. Charudattan Department of Plant Pathology University of Florida Gainesville, Florida	Plant Pathogens as Weed Control Agents: Successes, Challenges, and New Developments.
May 10	Qingli Liu Nematology University of California, Davis	Genetics of Root-knot Nematode, <i>Meloidogyne hapla</i> .
May 17	JoAnne Engebrecht Molecular and Cellular Biology University of California, Davis	Analysis of DNA Replication and Chromosome Behavior during Meiosis in <i>Caenorhabditis elegans</i> .
May 24	Don Strong Ecology and Evolution University of California, Davis	Dispersal and Persistence of Entomopathogenic Nematodes.
May 31	Holiday	
June 7	Ashleigh Smythe Nematology University of California, Davis	Molecular Phylogenies and the Evolution of Simple-lipped Cephalobid Nematodes.

*** This is a one unit Nematology (NEM290) seminar and enrollment is open to students.**

****Special Seminar with Dr. Charudattan on Thursday, May 6 in 103 Hutchison Hall.**
